Draw a map of sounds

Materials list

Paper Crayons or pencils

Make it together

Listen for a moment
Choose a spot together and pause. What can you hear?

Put yourself in the middle
Draw yourself, then add sounds around you in the directions they come from.

Share your map
Try dots, waves or pictures for each sound. Tell someone what your marks mean.

A map can show what we hear as well as what we see.

Save your map and a voice note about the sounds in Little Binder.

Little Binder

Free for home, school and community. Please keep the Little Binder credit.
